# Descrierea proiectului:

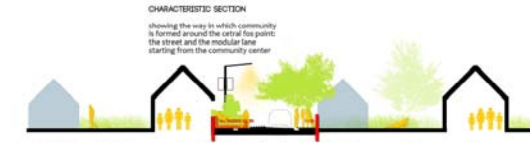

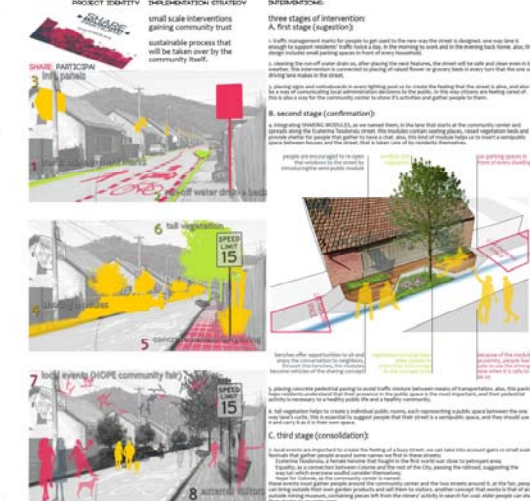

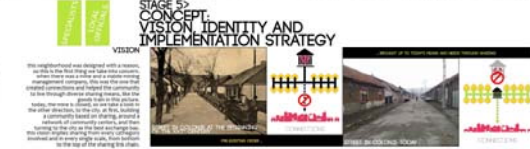

COMMUNITY CENTER OF TWO STREETS IN COLONIE NEIGHBORHOOD OF PETROSANI, ROMANIA

SHARE EQUALS  
RECEIVE

**PURPOSE ABSTRACT** this project concerns an underprivileged community of Petrosani city in Romania, following the decay of our mining industry several neighborhoods, designed in the XIX<sup>th</sup> century to shelter the mine workers' families, found no meaning but to collect and sell scraps of the former industrial sites, one of this neighborhoods is "Colonia", sheltering almost 5000 individuals. The process we are showing in here is part of a greater scale strategy for urban quality renewal, primarily based on social and community needs. It is only concerning two streets and a community center, and it's focused on the urban life quality as an engine for community renewal and sustainability. We believe that this process will become an example of good practice and a model for other urban structures in Romania.

**CONCLUSION**  
safety + trust + life quality + community

A SELF-SUSTAINED METHOD IN WHICH A DEPRIVED COMMUNITY IMPROVES ITS LIFE QUALITY PARAMETERS THROUGH A HANDS-ON PROCESS
